Aivira

Complete 20-Module Feature Catalogue

One AI. Every stage of life. Every responsibility.
From a school child to a startup founder or company owner.

Product vision
A universal AI personal assistant that understands real-life situations, remembers commitments, organises responsibilities and helps people take the right actions.

1. AI Voice Assistant

Voice interaction options

1. Multilingual Voice Assistant	Talk naturally in Hindi, English and Hinglish.
2. Real-time Voice Interaction	Live waveform, speech recognition and natural voice responses.
3. AI Intent Understanding	Understand multiple instructions from a single sentence.
4. Text-Based Interaction	Type messages whenever voice interaction is inconvenient.
5. Continuous Conversation	Continue conversations with contextual understanding and interruption support.
6. Automatic Language Detection	Recognise the user's language and respond appropriately.

2. AI Calling Assistant

Three calling options and call management

1. WhatsApp Calling	Personal calls and group calls through WhatsApp.
2. Normal Phone Calling	Call mobile numbers using the device's phone dialer.
3. Aivira-to-Aivira Calling	Internet-based voice calls between registered Aivira users.
4. Schedule Calls With Others	Schedule calls with individuals or groups and send invitations where supported.
5. Personal Call Reminders	Remind yourself to call someone at a particular time.
6. Call History	View incoming, outgoing, missed and completed Aivira calls.
7. Smart Contact Selection	Select personal contacts, WhatsApp contacts and registered Aivira users.
8. Incoming & Outgoing Call Screens	Display caller details, ringing status and call controls.
9. Smart Call Controls	Mute, speaker, accept, reject and end calls.
10. Missed Call Follow-up	Create reminders for important unanswered calls.
11. Recurring Call Scheduling	Schedule recurring calls with family, clients or team members.
12. Call Invitations	Send invitations to registered Aivira users and track acceptance.

3. Family & Child Management

FamilyLife Manager

1. School Fee Reminders	Remind parents before their child's school fee payment deadline.
2. Homework Tracker	Manage homework, assignments and pending school activities.
3. Exam & Result Alerts	Remember examination dates, results and academic deadlines.
4. School Event Reminders	Track PTMs, school functions, holidays and parent meetings.
5. School Transport Alerts	Remind parents about school bus pickup and drop timings.
6. Parent-Child Task Sharing	Parents can assign age-appropriate responsibilities to children.
7. Family Calendar	Manage family birthdays, events, appointments and schedules.
8. Document Expiry Alerts	Remember school IDs, certificates and important document renewals.
9. Child Activity Updates	Share parent-approved updates about important school activities.
10. Family Follow-up Reminders	Remind family members about pending responsibilities.

4. Smart Driving & Urgent Call Assistant

DriveSafe Assistant

1. Automatic Driving Mode	Enable a simplified hands-free interface when driving is detected and permission is granted.
2. Urgent Call Alerts	Announce incoming calls and identify callers marked as important.
3. Hands-Free Call Handling	Answer or reject supported calls through headset or voice controls.
4. Priority Contact Management	Give selected family members, managers or emergency contacts priority.
5. Driving Auto-Reply	Offer approved messages explaining that the user is driving.
6. Voice Notification Reading	Read important notifications aloud.
7. Delivery Instruction Reading	Read customer addresses and delivery instructions aloud.
8. Missed Call Callback Reminder	Remind the user to return important calls after driving.
9. Emergency Contact Access	Provide hands-free access to designated emergency contacts where supported.
10. Bluetooth & Headset Integration	Support compatible Bluetooth devices and hands-free controls.

5. Smart Money & Payment Manager

MoneyMate

1. School & College Fee Dues	Remind parents and students about fee payment deadlines.
2. Electricity & Utility Bills	Track electricity, water, internet and other utility bills.
3. Rent Reminders	Remind tenants and landlords about monthly rent.
4. EMI & Loan Reminders	Remember loan instalments and payment deadlines.
5. Subscription Renewals	Notify users before recurring subscription charges.
6. Employee Salary Reminders	Remind company owners about pending salary processing.
7. Customer Payment Dues	Track outstanding payments and customer follow-ups.
8. Invoice & Bill Management	Organise invoices, receipts and payment dates.
9. Payment Confirmation	Mark payments as completed and maintain records.
10. Expense Tracking	Record and categorise personal or household expenses.

6. Smart Work & Employee Assistant

WorkMate AI

1. Employee Attendance Reminders	Remind employees to mark their attendance.
2. Shift Management	Notify employees about their upcoming shifts.
3. Task Delegation	Assign responsibilities to employees through voice commands.
4. Work Deadline Alerts	Notify employees about pending work and deadlines.
5. Team Meeting Coordination	Coordinate suitable meeting times for team members.
6. Leave Management	Track leave requests, approvals and availability.
7. Salary Processing Reminders	Remind employers about monthly payroll activities.
8. Employee Work Follow-up	Remember to check pending tasks and progress.
9. Daily Work Summary	Summarise completed and pending team activities.
10. New Employee Onboarding	Track joining dates, documents and onboarding tasks.

7. Personal Safety & Emergency Assistant

SafeCircle

1. SOS Emergency Alert	Send emergency alerts to selected trusted contacts.
2. Live Location Sharing	Share location with trusted contacts after consent.
3. Emergency Contact Calling	Quickly reach designated emergency contacts.
4. Safe Arrival Check-in	Ask users to confirm that they reached home safely.
5. Travel Check-in	Schedule check-ins during long journeys.
6. Missed Check-in Alerts	Notify trusted contacts when a configured check-in is missed.
7. Emergency Information	Store important emergency contacts and instructions.
8. Personal Safety Routine	Create recurring safety check-ins for selected journeys.

8. Health & Elderly Care Assistant

CareMate

1. Medicine Reminders	Create daily and recurring medication reminders.
2. Doctor Appointment Alerts	Remember upcoming medical appointments.
3. Daily Health Routine	Remind users about exercise, walking and hydration.
4. Elderly Parent Care	Help family members organise elderly parents' daily routines.
5. Medicine Confirmation	Track whether medication reminders have been confirmed.
6. Caregiver Notifications	Notify authorised caregivers about configured missed confirmations.
7. Prescription Refill Alerts	Remind users when medicines may need refilling.
8. Health Document Management	Organise user-provided medical reports and appointment notes.
9. Health Check-up Schedule	Remember routine health check-up dates.

9. Smart Shopping & Delivery Manager

TrackMate

1. Order Tracking	Keep track of expected parcel deliveries through connected services.
2. Delivery Alerts	Remind users about expected deliveries.
3. Delivery Boy Communication	Help manage delivery calls through DriveSafe.
4. Smart Shopping Lists	Create shopping lists using voice commands.
5. Grocery Reminders	Remember recurring household purchases.
6. Return Deadline Alerts	Remind users before return windows expire.
7. Warranty Reminders	Remember product warranty expiry dates.
8. Service & Repair Appointments	Track repair, installation and maintenance visits.

10. Startup & Business Owner Assistant

FounderOS

1. Investor Follow-up	Remind founders to contact investors and send pitch decks.
2. Client Management	Remember client discussions, commitments and requirements.
3. Meeting Preparation	Prepare notes and important points before meetings.
4. Business Decision Memory	Remember important business decisions and their context.
5. Team Coordination	Manage meetings, responsibilities and team activities.
6. Contract & Agreement Deadlines	Remember agreement renewals and important contract dates.
7. Vendor Follow-ups	Track supplier communication and pending deliveries.
8. Business Expense Reminders	Remember company bills and payment deadlines.
9. Daily Founder Briefing	Summarise meetings, tasks and pending business decisions.
10. Opportunity Tracker	Remember leads, partnerships and business opportunities.
11. Pitch & Presentation Preparation	Organise presentation deadlines and meeting material.
12. Business Goal Tracking	Track milestones, targets and important objectives.

11. Communication & Relationship Manager

ConnectAI

1. Important Call Reminders	Remind users to call important contacts.
2. Birthday & Anniversary Alerts	Remember birthdays and special occasions.
3. Missed Call Follow-up	Remind users to return important missed calls.
4. Scheduled Calls	Organise future personal and professional calls.
5. WhatsApp Assistance	Open personal or group conversations for supported actions.
6. Aivira Internet Calling	Connect registered Aivira users.
7. Meeting Invitations	Create and share meeting invitations.
8. Relationship Notes	Remember useful details that users save about contacts.
9. Follow-up Tracking	Remember when someone needs a response.
10. Important Contact Groups	Organise family, friends, clients and professional contacts.

12. Travel & Daily Journey Assistant

TravelMate

1. Journey Reminders	Remind users before departure.
2. Flight & Train Alerts	Track journey timings using available connected information.
3. Packing Checklist	Remember important items to carry.
4. Hotel Booking Reminders	Organise check-in dates and booking details.
5. Travel Document Alerts	Remember passport and ID expiry dates.
6. Route Preparation	Prepare travel plans and journey schedules.
7. Family Travel Updates	Share journey updates with selected contacts.
8. Travel Driving Mode	Enable DriveSafe for supported hands-free assistance.

13. Smart Home & Household Manager

HomeMate

1. Household Chores	Assign and track cleaning and daily responsibilities.
2. Water & Electricity Alerts	Remember household checks and bill-related tasks.
3. Appliance Maintenance	Track AC, refrigerator and other service dates.
4. Gas Cylinder Reminders	Remind users to check or book gas refills.
5. Domestic Help Schedule	Remember maid, cook and maintenance timings.
6. Family Shopping Lists	Maintain shared grocery lists.
7. Family Task Sharing	Distribute household responsibilities.
8. Home Expense Tracking	Record and organise household expenses.
9. Home Maintenance Follow-up	Remember pending repair and maintenance work.

14. AI Daily Briefing & Personal Intelligence

LifeOS Intelligence

1. Morning Briefing	Tell users about today's important activities and responsibilities.
2. Evening Summary	Summarise completed and pending work.
3. Priority Detection	Highlight the most important upcoming responsibilities.
4. Conflict Detection	Identify overlapping meetings and tasks.
5. Missed Responsibility Alerts	Highlight overdue tasks and missed follow-ups.
6. Contextual Suggestions	Suggest actions based on saved tasks, commitments and schedules.
7. Natural Language Memory	Retrieve previously saved information using normal questions.
8. Personalised Recommendations	Adapt assistance to the user's persona and preferences.
9. Daily Activity Insights	Show how the user spends time across important activities.
10. Intelligent Schedule Optimisation	Suggest better ways to organise available time.

15. Smart Commitment & Follow-up Intelligence

PromiseOS

1. Promise Tracker	Remember commitments such as sending a file, completing work or returning a call.
2. Waiting For Tracker	Track pending replies, payments, documents and approvals.
3. Smart Follow-up	Remind users when customers, colleagues or friends need a response.
4. Smart Escalation	Escalate overdue important responsibilities according to configured rules.
5. Adaptive Reminders	Adjust reminder timing based on priority and user preferences.
6. Commitment Completion	Track whether promises and follow-ups were completed.
7. Commitment History	Review previous commitments and their outcomes.
8. Shared Responsibility Tracking	Track tasks delegated to authorised family or team members.

16. AI Document & Information Manager

DocuMind AI

1. Document Intelligence	Extract useful information from bills, notices, circulars and invoices.
2. Automatic Deadline Extraction	Identify payment deadlines, appointments and expiry dates.
3. Invoice & Receipt Recognition	Extract amounts, vendors and transaction details.
4. School Circular Understanding	Identify school fee dates, holidays, exams and events.
5. Document Search	Find information across saved documents using natural language.
6. Smart Document Organisation	Organise personal, family and business documents.
7. Expiry Notifications	Create reminders for important document renewals.
8. Document Summaries	Summarise long documents into important points.

17. AI Memory & Voice Notes

MemoryOS

1. Voice Notes	Record and save ideas, discussions and important information.
2. AI Summarisation	Generate summaries, decisions and extracted tasks.
3. Long-Term AI Memory	Retrieve information from previously saved notes using RAG.
4. Ask Your Memory	Ask questions about previous meetings, conversations and saved information.
5. Smart Note Categories	Organise notes into personal, academic, family and business categories.
6. Audio Transcription	Convert voice recordings into searchable text.
7. Automatic Task Extraction	Find tasks and commitments inside saved notes.
8. Source-Based Memory	Show which saved note or recording supports an AI answer.
9. Memory Controls	Review, disable or delete saved memory according to user settings.

18. AI Automation & Human Approval

ActionOS

1. Smart Action Detection	Identify tasks, events, reminders and requested actions.
2. AI Email Assistance	Prepare, edit and send emails after user approval.
3. Human Approval System	Approve, edit or reject sensitive actions before execution.
4. Calendar Automation	Create and update approved calendar events.
5. Communication Automation	Prepare messages and open supported communication services.
6. Payment Assistance	Prepare payment information while requiring explicit user confirmation for payment.
7. Action History	Maintain completed, failed and rejected action records.
8. Action Undo & Recovery	Offer undo or recovery where the underlying action supports it.
9. Permission-Based Automation	Control what Aivira may do independently and what requires approval.

19. Personalisation & Settings

Personalisation Center

1. Personalised Personas	School Student, College Student, Professional, Founder, Company Owner and Household.
2. Language Preferences	Hindi, English and Hinglish.
3. Voice Customisation	Choose voice, speech style and playback speed.
4. Notification Preferences	Control reminder, call and activity notifications.
5. Privacy & Security	Manage permissions, recording consent and data access.
6. Personal Data Management	Export, review and request deletion of personal information.
7. Light & Dark Themes	Choose the preferred application appearance.
8. Family & Organisation Workspaces	Manage personal, family and company spaces with separate permissions.
9. Role-Based Access	Control what children, parents, employees and administrators can access.
10. Connected Accounts	Manage authorised integrations and connected services.

20. Technical & Platform Capabilities

Platform Infrastructure

1. Android-First Application	Built using Expo, React Native and TypeScript.
2. Offline Support	Cache tasks and notes and queue text requests when offline.
3. Smart Notifications	Local scheduled notifications and push notifications.
4. Secure Backend	FastAPI backend with authenticated APIs.
5. Gnani Speech Integration	Speech-to-text and text-to-speech through the backend.
6. Persistent Data & Memory	Structured storage, voice notes and retrieval.
7. Secure Action Execution	Secure tokens, approval workflows and permission management.
8. Background Synchronisation	Synchronise supported tasks, reminders and notifications.
9. Third-Party Integrations	Connect authorised calendar, communication, payment and productivity services.
10. Accessibility Support	Screen-reader labels, font scaling and accessible controls.

21. Situation Intelligence – Real-life Examples

Aivira should not only wait for exact commands. It should understand context and suggest useful actions, while asking permission before acting.

School fee
Situation: School fee is due in five days.
Aivira suggestion: Rohan's school fee of ■8,000 is due on 15 December. Would you like me to remind you on 12 December?

Delivery executive
Situation: The user is riding and receives an important call.
Aivira suggestion: Your delivery manager is calling. You can answer using your headset or call back when safe.

Startup founder
Situation: An investor follow-up is due today.
Aivira suggestion: You planned to send the updated pitch deck to your investor today. Would you like me to prepare an email draft?

Elderly parent
Situation: A scheduled medicine reminder remains unconfirmed.
Aivira suggestion: Papa's 9 PM medicine reminder hasn't been confirmed. Would you like to send a check-in notification?

22. Main Application Areas

Personal Life	FamilyLife · MoneyMate · HomeMate · TravelMate
Communication	Calling Assistant · DriveSafe · ConnectAI
Productivity	WorkMate · Planner · Tasks · PromiseOS
Health & Safety	CareMate · SafeCircle
Business	FounderOS · Employee Management · Business Intelligence
AI Intelligence	LifeOS · MemoryOS · DocuMind AI · Situation Intelligence
Automation	ActionOS · Smart Reminders · Smart Escalation

23. Product Positioning

Aivira
Your Life. Your Work. One AI.
From managing a child's school fees to handling a company's daily responsibilities, Aivira helps people remember, organise, communicate and act.

One platform. Multiple personas. Intelligent assistance.

Implementation note: This is a proposed feature catalogue, not a claim that every feature is already implemented. WhatsApp, native phone calling, VoIP, payments, background services and automatic driving detection each require separate platform integrations and permissions.

Safety note: Children, financial actions, health information and driving features need additional safety and privacy controls. Driving features should prioritise hands-free use and never encourage phone interaction while riding.

Aivira

Updated Safety Agent – Integrated Feature Addendum

This update expands the original DriveSafe and SafeCircle concepts into one intelligent safety module.

Updated module name: Aivira Safety Agent
One safety engine with specialised modes for women, delivery riders, drivers, walkers, travellers, families and elderly users. It combines journey check-ins, hands-free assistance, trusted contacts and permission-based emergency workflows.

1. Women's Safety Assistant

A set of consent-based tools for women travelling alone, commuting or feeling unsafe.

1. Live Location Sharing	Share real-time location with selected trusted contacts during a journey, with the user's permission.
2. Safe Journey Timer	Set an expected arrival time and request a safety check-in at the destination.
3. SOS Emergency Activation	Send an emergency alert and available location information to selected trusted contacts.
4. Route Deviation Alert	Detect a significant unexpected route change where location access and suitable detection are available; ask the user to confirm they are safe.
5. Emergency Calling	Offer quick access to trusted contacts or configured emergency services.
6. Missed Check-in Alert	Notify selected trusted contacts if a configured check-in is missed.
7. Voice-Activated SOS	Allow a configured voice command to start the emergency workflow where supported.
8. Hands-Free Safety Mode	Support voice interaction through compatible headsets while walking or travelling.
9. Trusted Circle	Create a private group of family members or friends for journey updates.
10. Discreet Emergency Shortcut	Provide a quick, discreet way to trigger an alert without navigating multiple screens.

2. Smart Real-Life Safety Scenarios

A. Woman travelling alone at night
The user starts Safe Journey Mode, selects a destination and trusted contact, shares location with permission, and sets an arrival timer. If the check-in is missed, Aivira follows the user's configured alert and escalation rules.

B. Unexpected route deviation
Aivira detects a significant deviation from the planned route where supported, asks whether everything is okay, and offers options to contact a trusted person or activate SOS. A route change alone is not treated as proof of danger.

C. Delivery rider receives an urgent call
Aivira announces the caller, supports compatible hands-free call controls, offers an approved driving auto-reply if unanswered, and reminds the rider to call back when safe.

D. User feels unsafe
The user triggers SOS through a configured voice command or discreet control. Aivira alerts selected trusted contacts, shares available location information and offers emergency calling.

3. One Agent, Multiple Safety Modes

Women's Safety	Journey protection, trusted contacts, check-ins and SOS.
DriveSafe	Drivers and delivery riders; urgent call announcements and hands-free support.
SafeWalk	Check-ins and trusted-contact sharing for people walking alone.
Travel Safety	Journey schedules, destination check-ins and travel updates.
Family Safety	Consent-based family check-ins and safety notifications.
Elderly Safety	Routine check-ins and caregiver notifications based on configured rules.

4. Aivira Safety Center – Suggested App Layout

Safety Modes	Women's Safety · DriveSafe · SafeWalk · Travel Safety · Family Safety · Elderly Safety
Trusted Contacts	Manage selected people who can receive check-ins and emergency alerts.
Journey History	Review completed journeys and check-in records.
Emergency Settings	Configure SOS shortcuts, alert rules, permissions and escalation preferences.

5. Core Differentiator: AI Safety Check-in Intelligence

Aivira should understand the journey context rather than send only generic notifications. A user might say: “I'm going to college; I'll reach home by 7 PM”, “I'm travelling alone to the railway station” or “I'm delivering an order in an unfamiliar area.” Aivira can propose an appropriate check-in schedule, keep authorised contacts informed and offer help if a check-in is missed.

6. Integration with the Original Catalogue

Original DriveSafe Assistant	Its driving mode, urgent call alerts, hands-free call handling, priority contacts, driving auto-reply, voice notifications and delivery instructions are retained as the DriveSafe mode.
Original SafeCircle	Its SOS alert, emergency contacts, live location sharing, safe-arrival check-in, travel check-in and missed check-in alerts are incorporated into Aivira Safety Agent.
Updated structure	Aivira Safety Agent becomes the umbrella module. DriveSafe and SafeCircle capabilities become specialised modes rather than disconnected modules.

7. Safety, Privacy & Implementation Requirements

Consent-based location access	Explain when location is shared, with whom, and for how long. Let users stop sharing.
No false certainty	A route deviation or missed check-in is a signal to check, not proof of an emergency.
Configurable escalation	Users choose trusted contacts, timing, retries and what happens after a missed check-in.
Hands-free driving safety	Do not encourage phone interaction while riding or driving. Use compatible hands-free controls and follow platform restrictions.
Emergency service availability	Do not promise automatic rescue or guaranteed emergency-service connection; availability depends on device, network, region and integrations.
Child and vulnerable-user safeguards	Use age-appropriate controls, authorised guardians and careful permission management.
Data protection	Protect location history and emergency information with strong access controls and retention settings.

Aivira Safety Agent

One intelligent safety companion for everyday journeys and real-life situations.

From a woman travelling alone to a delivery rider on the road, a family member checking in or an elderly person living independently.
